Profile Summary

I am Farid Habibli, a DevNetOps professional and Software Engineer with a strong foundation in programming and networking. I graduated from Baku State University, Faculty of Computer Science, in May 2023. My expertise spans multiple programming languages and frameworks, including C++, C#, Python, Django, and React. I excel at Full Stack Development and have hands-on experience with modern deployment technologies and network administration.

Work Experience

Telecom Invest

Role: **DevNetOps, Software Engineer**

October 2023 - Present

- Automated city telephone systems using Python, Celery, Selenium, Django, and React TS.
- Developed solutions for network switch management to enable single-command device backups.

Code Star

Role: Mentor, Software Engineer
